It was a lively gathering at the sportsmans banquet and meeting held at the Board of Trade club rooms Thursday night of last week. About sixty sat down to a fine six o'clock dinner that was put on for the association by Chef Wm. H. Cody. The menu consisted of the following; Roast veal and boiled ham, mashed potatoes, baked beans, salad, rolls, rendered many fine selections.

T. W. Hanson, president of the association, acted as master of ceremonies and introduced speakers as follows: Editor Eugene Matheson, Roscommon; James MacGillivray official Branch; Game Warden Reuben S Babbitt, Marius Hanson and M. A. Bates of Grayling. There were some splendid talks and many ideas wer suggested that may be useful in the conservation of wild game and fish and our forests. At the conclusion of the several addresses Pres. Hanson announced that it was the intentior of the local association to hold the largest sportsmans gathering ever pulled off in Michigan here next summer. This would be staged at Lake Margrethe, and among the events of the occasion would be a really-togoodness barbecue Invitations would be extended to sportsmans associa-tions of all northern Michigan.

At this stage the meeting was handed over to James MacGillivray who presented several reels of rare pictures, showing many scenes of wild animals and birds taken in their na-(a) (naunts endished ing many of their habits and instincts. Views of scenes taken at Isle Royal last summer were specially interesting. This wonde island will no doubt sometime be take en over by the U.S. government and designated as a national park. It is located near the north shore of Lake

Superior.

Not the least interest at thi event were the exhibits that were placed about the room by the decorat placed about the room by the decorating committee—Al Cramer and Geo Burke. There were many kinds of stuffed Michigan wild animals, birds and fish, including practically every specie of trout. About the room hund many hunting and fishing pictures. A collection of antique firearms was displayed upon one of the billiard table while on the other table were some of the finest shot gurs and rifles to be the finest shot guns and rifles to be had anywhere. STATE OF MICHIGAN

STATE OF MICHIGAN

To the Circuit Court for the County of Crawford, in Chancery:
The petition of Oramel B. Fuller, Auditor General of the State of Michigan, for and in behalf of said State, respectfully shows that the list of lands hereinafter set forth and marked "Schedule A," contains a description of all lands in said County of Crawford upon which taxes were assessed for the years mentioned therein, and which were returned as delinquent for non-payment of taxes, with interest computed thereon to the time fixed for sale, and collection fee and expenses, as provided by law, extended against each of said parcels of land.

Your petitioner further shows to the Court that said lands were returned to the Auditor General under the provisions of Act 266 of the Public Acts of 1893, as definitioned in the property of the payment of said taxes for said years respectively, and that said laxes remain unpaid; except that lands included in said "Schedule A" for taxes of 1890 or prior years were returned to the Auditor General as delinquent for said taxes under the provisions of the general tax haws in force prior to the passage of Act 200 of the Public Acts of 1891, and which taxes remain unpaid.

Your petitioner further shows that in all cases where lands are included in "Schedule A" as aforesaid for taxes of 1890 or of any prior year, said lands have not been sold for said taxes or have been set aside by a court of competent jurisdiction, or have been cancelled as provided by law.

Your petitioner further shows and avers that the taxes, interest, collection fee and expenses as set forth in said "Schedule A" are a valid lien on the several parcels of lands described in said schedule against the said taxes not having been paid, and the same being now due and remaining ungaid as above set forth, your petitioner pmys a decree in favor of the State of Michigan against each parcel of said lands, for the payment of the several amounts of taxes, interest, collection fee and expenses, as computed and extended in said schedule agai

Daugherty Won't Resign and Will Be Investigated —Reed on McAdoo.

By EDWARD W. PICKARD

A TTORNEY GENERAL DAUGH-ERTY, less complaisant than Mr. Denby, will not get out of the cabinet oluntarily—at least not for the pres ent. President Coolidge will not ask for the resignation of the nation's chief law officer. The senate will go ahead with its proposed investigation of the conduct of Mr. Daugherty and the Department of Justice, without opposition by the administration forces. These conclusions were reached the of earnest consultations in the White House. The President conferred at length with William M. Butler, his campaign manager; Frank W. Stearns, his Boston backer, and with other party leaders. He reached the conclusion, it is said, that Mr. Daugherty's continued presence in the cabinet would be very injurious to the chances of the Republican party, especially in Ohio, and that he should resign. This concurred with the advice given the per. But the attorney general himself was still to be dealt with. On Wed-nesday he went to the White House early and talked with Mr. Coolidge for an hour. No results. Mr. Butler called again, and in the afternoon Mr. Daugherty returned. He declared with finality that he would not quit the cabinet unless his resignation were requested in writing, since he was innocent of any wrongdoing and was ready to be investigated by the senate committee President Coolidge, through Secretary Slemp, then gave out his decision not to demand Mr. Daugherty's resigna

"It is not my purpose to even consider tendering my resignation as attorney general until after a fair hear ing on charges preferred against me. The attorney general at once left Washington for Chicago on business connected with the prosecution of Charles R. Forbes, former director of the veterans' bureau. From there he planned to go to Florida, not returning to the capital for two weeks. By duct presumably will have begun. I ls believed in Washington that Mr. Daugherty will resign at the conclu sion of the inquiry, which he is confident will result in his vindication. Those who urge his elimination point out that, even if his honesty and effigation, his admissions of having spec ulated in Sinclair Oil stocks after en tering the Harding cabinet are confes sions of grave impropriety and indis

tion, and the latter gentleman issued

this statement:

E ARLY in the week the Republican national committee took a hand in the oll controversy by issuing a state ment defending the policy of leasing navy oil reserves and undertaking to place the blame, if any, on Democrats.

"The leasing act, which gives to the secretary of the navy and the secretary of the interior the right and pow-er to lease public oil reserves to private interests was fathered by Walsh That particular section of the act under which Secretary Denby acted in signing leases to Doheny and Sinclair was not only suggested by Secretary Daniels, but was written by him practically word for word as it now pears in the law. He frankly stated he wanted such power in order to enable him to do exactly what Secretary Denby subsequently did.

"The leasing act received its first application under Daniels and John Barton Payne, when oil lands both within and without the naval oil reserves were leased to private interests o be developed by them on a royalty basis."

Mr. Payne was secretary of the interior and has been mentioned by his friends as a presidential possibility. The committee's statements met with denials from Daniels and others.

the week. C. Bascom Slemp, secretary to the President, was the first witness, and he told the committee he dined frequently with Fall and E. B. Mccalled on to tell the senators. Their was strengthened by the reading of many telegrans that passed between Washington and Florida, revealing the strenuous efforts made to call off Senator Walsh from his intention of putting McLean on the witness stand The messages showed A. Mitchell Palmer tried to induce Senator Under-wood, to influence Walsh, and the names of William G. McAdoo and his son Francis appeared. McLean, it appeared, leased a wire from Washing ton to his Palm Beach cottage and the chief White House telegrapher was engaged to operate it. The committee decided to call Mr. Palmer to the

SENATOR JIM REED of Missouri, he of the serpent's tongue, formally opened his campaign for the Demoratic presidential nomination by a characteristic speech in St. Louis. Pessimistic and bitter as usual, he de-clared that "not one-tenth of the corruption and iniquity which has exist-ed" in oil lease affairs has yet been laid hare, and then he exercised his peculiar talents, in excortating William G. McAdoo, his leading rival. Citing an array of alleged facts and figures, he undertook to show that McAdoc expected to receive \$1,094,000 in legal fees from E. L. Doheny, the oil magnate, from the Charles W. Morse interests and the motion-picture concerns, "although he did not appear in a single lawsuit." Winding up his relation of McAdoo and oil, Reed said it was not until on February I, when Doneny "was compelled to disclose the fact that he had employed Mr. Mc-Adeo." that "Mr. McAdoo was selzed

by a spasm of virtue and resigned." "The sole reason he guit," the sena tor concluded, "was because his em ployment had become known,

"Some of you may play poker. state it merely upon information and belief that there is an old poker rule: "'Anybody caught cheating has got to quit the game."

The Republicans lost no time in reading the Reed speech into the rec-

ord of the senate. The Youngstown (O.) Vindicator published a story that McAdoo, received a fee of about \$200,000 for rep resenting the Republic Iron and Steel company in a tax reclamation case before the tax commission. McAdoo admitted that his former New York law

DEMOCRATS in the lower house assisted by the insurgent Republicans, did a lot of things to the Mellon tax bill. Over the protest of the secretary of the treasury they boosted the maximum tax on estates and in heritances from 25 to 40 per cent, with an amendment by which an allowance would be made for taxes paid on inheritances under state laws. Next after an exciting debate and several neur-fights, the house adopted an amendment by Green of Iowa, one of the agricultural group, which imposes a tax ranging from 1 per cent on gifts worth \$50,000 to 40 per cent on those of \$10,000,000 or more, all gifts under \$50,000 being exempt. The cigarette tax was then raised from \$3 to \$4 per thousand, Representative Garner asserting this would add \$60,000,000 a year in revenue, and the clause in the Mellon bill doing away with the tax on theater admissions amounting to 50 cents or less was adopted. The tax on their naval defenses. auto tires and parts was cut in half.

It was agreed that a final vote on the would_be taken before the end of the week and Representative Longworth, majority leader, spent two days in a final effort to arrange a compromise on the maximum surtax rate.

Secretary Mellon was advised by Senator Smoot that the senate is just as radical as the house, if not more so, and that there is little chance of any material reduction in tax rates beis passed by the house.

Washington-The year 1923 estab ished a new record in the exportation of passenger cars and from the United States and Canada, with a combined total number of 221,-816 and a value of \$139,849,020. The increase over 1922 amounted to 105. in number and \$58,374,203 in value. Even the previous high record year of 1920 was surpassed by a margin of 27.160 cars and trucks, although a lower unit price reduced the total valuation.

Will Your Family Be Happy This Spring?

If yours is one of the few remaining families lacking an automobile, no doubt you have finally decided to get one within the next four months.

A low-priced modern automobile like the Chevrolet has become indispensable to the family of ordinary income. A million other families can easily prove to you that the better way is with Chevrolet. The beauties of nature, the interesting and educational features of other places and ways of living, remain things to read about or seen dimly in cold photographs until you are free to get to them at your convenience and pleasure.

But, suppose you have definitely decided to buy a Chevrolet this spring. This does not necessarily mean you are going to get it. Anyone posted on conditions in the automobile business will tell you that thousands of families are going to be unable to get cars this spring. This has been true almost every spring for the last ten years. There are just two ways of making sure of getting your Chevrolet for use when the flowers and balmy breezes of spring lure you to the country roads—buy it now or order it now.

If you do not want to pay for it in full at this time, any Chevrolet dealer will arrange terms to suit your convenience. You will be surprised to learn how easy it is to pay for a Chevrolet and use it while you are paying for it.

Please realize these statements are made by us in good faith and we mean just what we say about the possible difficulties of getting a car delivered to you this spring if you wait until then to order it. The only way to be sure of a Chevrolet this Spring is to order it NOW.

The scientist found that by submitting the rock salt to high heat pressure before the elementary crystals be gan to decay he arrested the decay by changing the structural arrangement of the atoms and molecules, and this change increased the durability and ductility of the substance 300 times, says London Tit-Bits. He is continuing his experiments with other metal substances.

If this discovery can be applied to metals it will revolutionize the world It will mean, amongst other things, trains capable of running 200 miles and, turbine .steamers that could reach Australia in ten days.

Metal Star Marks Spot

Where Abe Lincoln Stood In front of Independence hall in Philadelphia, stands a statue of George Washington. It replaces the marble statue of the great American which was placed there by the contributions

to disintegrate and for that reason it had been removed to a corridor on the second floor of the city hall. On the sidewalk, near the new statue, in front of the cradle of liberty, is a metal star which marks the spot where Abraham Lincoln stood to raise a new American flag during the Civil war. The body of Lincoln reposed in state in Independence hall during the period when it was being conveyed to its place of burial in Springfield. The bodies of Henry Clay, John Quincy Adams and others were accorded similar honor.— Detroit News.

half-implied imputation. "I've shot men in my time. I never sold one." He stepped around the great sugar maple, motioned for the other to follow, and stole away along the brow of the bluff, quite obviously in serious earnest.

There seemed to be no one about except the comely mountain girl, who came to the open door a time or two to look out, as if she expected some one-some one that she would rather pression of her face—a face whose tragic sadness had so impressed the woousman at that strained and hurried interview.

It was late in the forenoon when above them on the hillside, they heard the swish of a brush swinging back the famous ranger that found the trail of the great Tecumseh, when it into place after having been dragged inside. Uncle Nick held up a cautious aside. Uncle Nick held up a cautious finger, and they crouched lower in the cover.

There came the snap of a dry stick man emerged from the swaying steps of where they lay. There could be no mistaking the powerful form and truculent face with its stubble of

Westgate Farm Rejoices.
The long-expected event has happened. Westgate Farm, the Maple Forest home of Mr. and Mrs. Richard Babbitt, rejoices in the arrival of a purebred Holstein heifer calf.
To some, this may not mean much; but, in the fortunes of Westgate Farm, it means a great deal.
It means reward for faith and patience. It means the triumph of an ideal. It means the beginning of better days. It means the posses-

It often takes months to set the at often takes mounts to set the stage just right to bring about the purchase of another purebred; but, it is going on all the time, for the future prosperity of this county lies in dairying.

Better sell that poor one to the butcher, and put the money you get for her into the Milk Maker dairy feed and make the other two produce heavily.

This milk-maker dairy feed is composed of twelve ingredients, and is the most cleverly balanced dairy ration I ever saw. Other County Agents tell me the same.

E made a canvass of many who bought rivals of Stude-bakers. We said, "Tell us why you liked your car the better." The majority said, "We did not even look at the Studebaker." Most of them bought new models of the car they owned before.

Yet Studebaker is a leader in the fine-car field today. Studebaker builds more quality cars than any other plant in the world.

Studebaker is the sensation of modern Motordom. Its amazing growth signifies a

new situation in this field. Last year, 145,167 finecar buyers paid \$201,000,-000 for Studebaker cars Nearly three times as many as in 1920.

Is it fair to yourselfor fair to us-not to learn the reasons for this trend?

Consider Studebaker history. For 72 years this concern has stood for high principles and policies.

For two generations, against all the world, it held first place in horsedrawn vehicles.

parts comes from the costliest steels. For some we add 15% to the quoted price to get exactness in them.

That Chase Mohair, used in our closed cars, is made from the soft fleece of Angora goats. Cotton or ordinary wool, or a combination of both, could reduce our price \$100 to \$150 per car, but it would sacrifice Studebaker quality.

worked out to exactness for supreme service in its place.

We employ 1,200 inspectors to make 30,000 inspections of the material and workmanship in each Studebaker car - before it leaves the factory.

Consider how Studebaker has always led in the building of high-grade cars. We were first to use cord tires as standard equipment. We were the first quantity manufacturers to build bodies of the highest grade.

If you want beauty, fine upholstery; rich finish and equip-

ment, consider that Studebaker has had more experience in fine coach building than any other motor car maker.

Our place no accident The pedestal place which Studebaker holds, in the fine-car field is not the result of accident. It comes from principles as old as this business-the ceaseless and determined ambition to excel.

Learn the result of these efforts. Compare detail by detail, part by part, with any car you wish. When you foot the advantages, you will find that they number scores.

* * *
These are facts you should know. They are inducing 150,000 per year to choose Studebaker cars.

Some sell at \$1,045. Some meet with every requirement in size and power and luxury. But the chassis are all alike, save in size. The same steels, the same standards throughout Every important Studebaker part represents the best we know.

People have learned these facts—hundreds of thousands of them. The demand for Studebakers has almost trebled in three years. It has become overwhelming, even for our facilities. Investigate the reasons. You will

find them by the scores. Then, if you choose a rival car, we shall have nothing more to say.
